SUMMARY

DevOps Engineer specializing in Kubernetes and Infrastructure as Code, with experience in designing private cloud platforms, automating infrastructure provisioning using Terraform and Ansible, implementing GitOps deployments with ArgoCD, and operating highly available Kubernetes clusters. Passionate about automation, system reliability, and improving the developer experience.

SKILLS

- **Cloud and Virtualization:** AWS, Azure, OpenStack, DigitalOcean, Proxmox VE, KVM, VMware, VirtualBox, Vagrant
- **Object Storage:** MinIO, DigitalOcean Spaces (S3-compatible)
- **Containerization and Orchestration:** Docker, Kubernetes, Helm
- **Infrastructure as Code and Automation:** Terraform, Ansible, Packer
- **CI/CD and DevOps Tools:** Backstage, Jenkins, ArgoCD (GitOps), Gitea, Harbor, Nexus
- **Monitoring and Logging:** Nagios Core, Prometheus, Grafana, Loki, Alloy, Kube-State-Metrics (KSM)
- **Programming and Development:** Python, Java, Spring Boot, JavaScript/TypeScript, Angular, Express.js, SQL/MySQL
- **Operating Systems:** Linux (Ubuntu, CentOS, AlmaLinux)
- **Secret Management:** HashiCorp Vault, Sealed Secrets, External Secrets Operator (ESO), AWS Secrets Manager

EXPERIENCE

- 2/2025 – 3/2026 **DevOps engineer** Pocteo Factory
- Implemented Backstage developer portal to centralize microservices documentation and improve developer experience
 - Managed **3 Proxmox bare-metal servers**, including HA clustering and live VM migration, and administered HP iLO4 servers.
 - Packaged and deployed **over 10 applications** with Helm, configured multi-tenant Kubernetes clusters (Namespaces, NetworkPolicies, ResourceQuotas), and set up high-availability clusters using Kubespray, and MetalLB.
 - Automated infrastructure provisioning with Terraform and Ansible, reducing cluster deployment time **from 45 minutes to 12 minutes**, and created custom Linux VM images using Packer.
 - Implemented GitOps workflows with ArgoCD to ensure automated, traceable, and consistent deployments
 - Monitored **3 clusters and applications infrastructure** using Prometheus and Grafana.
 - Planned and executed Kubernetes disaster recovery, including hot migration and automated worker re-installation with Ansible reducing recovery time to **less than 5 minutes**.
- 2/2025 – 1/2026 **DevOps Engineer - Consultant** Asten Cloud (Brest, France)
- Deployed and managed **over 10 applications** on production Kubernetes clusters using Helm for packaging and release management, while developing and maintaining over **20 Helm charts**.
 - Monitored the health of **over 6 production and staging clusters** and **application performance** using Prometheus and Grafana.
 - Designed and configured **over 10 alerting rules** integrated with Mattermost to enable rapid incident detection and improve response time.
 - Managed container images and registries with Harbor and automated developer workflows via Gitea
 - Contributed to secrets management practices using Vault
- 1/2025 – 2/2025 **DevOps Engineer - Consultant** Tunihealth assistance
- Led The deployment process of Tunihealth app on OxaCloud a tunisian cloud provider.
 - Implemented automation measures using Jenkins to streamline application deployment.

1/2024 – 6/2024 **Engineering Graduation Project - Kubernetes as a Service (KaaS) Platform** Pocteo Factory 
6 Months

- Designed and deployed a multi-tenant Kubernetes platform on KVM infrastructure.
- Implemented governance mechanisms, including RBAC, resource quotas, and auditing.
- Implemented high availability and disaster recovery strategies.
- Established cost monitoring and resource allocation mechanisms.
- Enhanced cluster security and tenant isolation.

6/2023 – 8/2023 **Engineer Internship** Societe générale - UIB 
2 Months

- Designed and developed a dynamic full-stack forum web application using Spring Boot and Angular, incorporating robust user authentication, authorization systems, and responsive design. Additionally, implemented end-to-end CI/CD pipelines for testing and deployment, resulting in a streamlined development process.

6/2022 – 7/2022 **Professional Integration Internship** Assurance CTAMA 
1 Month

- I established a network monitoring system with Nagios, configuring the software to oversee network devices, servers, and monitored services.

1/2021 – 6/2021 **Bachelor's degree Graduation Project** E.S.A.T 
6 Months

- Using the Ansys HFSS software, I designed four types of antennas across the WiFi, 3G, and GPS bands. Then created physical prototypes of each antenna and conducted performance tests to evaluate their efficiency and effectiveness.

8/2020 – 9/2020 **Professional Integration Internship** Tunisie Télécom 
1 Month

- worked in CSC (Centre de Services Clientèle) department and received certificate of satisfaction upon completion of internship

EDUCATION

2021 - 2024 **Engineering Curriculum** ESPRIT
Engineering curriculum with a specialization in IT Architecture and Cloud Computing

2018 - 2021 **Bachelor's degree in computer science and telecommunications** ISTIC
Received an Academic Bachelor's Degree in Computer sciences and Telecommunications

PROJECTS

10/2022 – 5/2023 **Cloud project** ESPRIT
8 Months

- Led the design and planning of the global architecture for an Openstack cloud deployment and Microsoft Azure to ensure a hybrid deployment Model, including detailed project planning and timeline management.
- Installed and configured the cloud infrastructure as a service (IaaS) environment, implementing best practices for security, scalability, and high availability.
- Developed a functional orchestration solution using Kubernetes, integrating with other cloud services and tools to create a seamless and efficient workflow.
- Designed and developed a custom application using Springboot and Angular and deployed it on the cloud infrastructure, demonstrating practical proficiency with both infrastructure and software development.

1/2022 – 5/2022 **Cross-Platform Application Development** ESPRIT
5 Months

- Developed a desktop Web and mobile clients using the Frameworks javaFx,Symphony and Codename-One in association with the programming languages java, PHP and CSS

CERTIFICATIONS

2024 **Network Security**  CISCO

2021 **Big Data Engineer v2 Mastery Award (2018)**  IBM
