SUMMARY

DevOps and Cloud Engineer specializing in Kubernetes, infrastructure automation, and CI/CD delivery. Experienced in building HA clusters, automating deployments, and improving reliability across cloud and bare-metal environments. Strong focus on scalable architecture, security, and modern cloud-native practices.

SKILLS

- **Cloud and Virtualization:** AWS, Azure, OpenStack, DigitalOcean, Proxmox VE, KVM, VMware, VirtualBox, Vagrant
- **Object Storage:** MinIO, DigitalOcean Spaces (S3-compatible)
- **Containerization and Orchestration:** Docker, Kubernetes, Helm
- **Infrastructure as Code and Automation:** Terraform, Ansible, Packer
- **CI/CD and DevOps Tools:** Backstage, Jenkins, ArgoCD (GitOps), Gitea, Harbor, Nexus
- **Monitoring and Logging:** Nagios Core, Prometheus, Grafana, Loki, Alloy, Kube-State-Metrics (KSM)
- **Programming and Development:** Python, Java, Spring Boot, JavaScript/TypeScript, Angular, Express.js, SQL/MySQL
- **Operating Systems:** Linux (Ubuntu, CentOS, AlmaLinux)
- **Secret Management:** HashiCorp Vault, Sealed Secrets, External Secrets Operator (ESO), AWS Secrets Manager

EXPERIENCE

- 2/2025 – 3/2026 **DevOps engineer** Pocteo Factory
- Implemented Backstage developer portal to centralize microservices documentation and improve developer experience
 - Managed Proxmox bare-metal servers, including HA clustering and live VM migration, and administered HP iLO4 servers.
 - Packaged and deployed applications with Helm, configured multi-tenant Kubernetes clusters (Namespaces, NetworkPolicies, ResourceQuotas), and set up high-availability clusters using Kubespray, and MetalLB.
 - Troubleshoot and debugged Kubernetes environments, developed and managed Helm charts, and implemented security hardening with Falco.
 - Automated infrastructure provisioning with Terraform (Proxmox), deployed Kubernetes clusters via Ansible and Kubespray, and created custom Linux VM images using Packer.
 - Built and maintained CI/CD pipelines and ArgoCD, incorporating vulnerability scanning with Trivy.
 - Monitored infrastructure and applications using Prometheus and Grafana.
 - Planned and executed Kubernetes disaster recovery, including hot migration and automated worker re-installation with Ansible.
- 2/2025 – 1/2026 **DevOps Engineer - Consultant** Asten Cloud (Brest, France)
- Deployed and managed applications on Kubernetes production clusters using Helm for packaging and release management
 - Implemented GitOps workflows with ArgoCD to ensure automated, traceable, and consistent deployments
 - Monitored cluster health and application performance using Prometheus and Grafana
 - Designed and configured alerting rules integrated with Mattermost to ensure rapid incident detection and response
 - Managed container images and registries with Harbor and automated developer workflows via Gitea
 - Contributed to secrets management practices using Vault
- 1/2025 – 2/2025 **DevOps Engineer - Consultant** Tunihealth assistance
- Led The deployment process of Tunihealth app on OxaCloud a tunisian cloud provider.
 - Implemented automation measures using Jenkins to streamline application deployment.

1/2024 – 6/2024 6 Months	Engineering Graduation Project Pocteo Factory • Led setup and management of private Kubernetes as a Service (KaaS) cluster on KVM infrastructure. • Implemented multi-tenancy, governance, and cost monitoring measures. • Conducted infrastructure assessment, ensuring performance, security, and redundancy. • Enhanced security through regular audits, network measures, and patch management. • Optimized cluster reliability and performance with load balancing and resource monitoring. • Designed multi-tenancy architecture, enforcing security and resource allocation policies. • Implemented governance measures like RBAC and compliance auditing. • Managed cost monitoring and allocation, optimizing resource usage. • Conducted rigorous testing and contingency planning for disaster recovery.	
-----------------------------	--	--

6/2023 – 8/2023 2 Months	Engineer Internship Societe générale - UIB • Designed and developed a dynamic full-stack forum web application using Spring Boot and Angular, incorporating robust user authentication, authorization systems, and responsive design. Additionally, implemented end-to-end CI/CD pipelines for testing and deployment, resulting in a streamlined development process.	
-----------------------------	---	--

6/2022 – 7/2022 1 Month	Professional Integration Internship Assurance CTAMA • I established a network monitoring system with Nagios, configuring the software to oversee network devices, servers, and monitored services.	
----------------------------	---	--

1/2021 – 6/2021 6 Months	Bachelor's degree Graduation Project E.S.A.T • Using the Ansys HFSS software, I designed four types of antennas across the WiFi, 3G, and GPS bands. Then created physical prototypes of each antenna and conducted performance tests to evaluate their efficiency and effectiveness.	
-----------------------------	---	--

8/2020 – 9/2020 1 Month	Professional Integration Internship Tunisie Télécom • worked in CSC (Centre de Services Clientèle) department and received certificate of satisfaction upon completion of internship	
----------------------------	---	--

EDUCATION		
2021 - 2024	Engineering Curriculum ESPRIT Engineering curriculum with a specialization in IT Architecture and Cloud Computing	
2018 - 2021	Bachelor's degree in computer science and telecommunications ISTIC Received an Academic Bachelor's Degree in Computer sciences and Telecommunications	

PROJECTS		
10/2022 – 5/2023 8 Months	Cloud project ESPRIT • Led the design and planning of the global architecture for an Openstack cloud deployment and Microsoft Azure to ensure a hybrid deployment Model, including detailed project planning and timeline management. • Installed and configured the cloud infrastructure as a service (IaaS) environment, implementing best practices for security, scalability, and high availability. • Developed a functional orchestration solution using Kubernetes, integrating with other cloud services and tools to create a seamless and efficient workflow. • Designed and developed a custom application using Springboot and Angular and deployed it on the cloud infrastructure, demonstrating practical proficiency with both infrastructure and software development.	
1/2022 – 5/2022 5 Months	Cross-Platform Application Development ESPRIT • Developed a desktop Web and mobile clients using the Frameworks javaFx,Symphony and Codename-One in association with the programming languages java, PHP and CSS	

CERTIFICATIONS		
2024	Network Security CISCO	
2021	Big Data Engineer v2 Mastery Award (2018) IBM	

LANGUAGES		
Arabic - native, French - Fluent, English - Fluent
